

West Shore Road Update from Mayor Doug Watson

March 8, 2013

Yesterday, I visited the West Shore Road construction area to check on the status of the repairs. I spoke with the foreman at the site and he informed me that all of the utility lines are in place and operational. He also said that all of the drainage structures are either set or being finished.

The next step is for LIPA to remove all of the old utility poles along the road. After removal of the poles, the construction of the new sea wall can begin.

I will continue to keep you posted on the progress of the work.
